

# The First Family in Fluid Power Performance

**Alkon Corporation and Star Hydraulics** – two of the leading names in fluid power performance – are family in more ways than one. Official partners since 2012, both:

- ▶ Bring a long history of success through proof of performance
- ▶ Set, rather than simply meet, standards
- ▶ Are relationship-based suppliers
- ▶ Focus on solutions
- ▶ Manufacture in the USA

## 10,000+ SOLUTIONS for Pneumatic Applications

Custom & Stock Valves • Fittings • Flow Controls • Accessories

Name it. Anything you need...and nothing you don't. We welcome custom parts orders – even on short notice.

- ◆ **Alkon "less is best" design** – Minimum parts for maximum reliability, easy installation and maintenance, and longer, more reliable service life.
- ◆ **Applications** – Automation systems, entertainment, foodservice, manufacturing, medical technology, mining and construction, military, nuclear energy, refrigeration, retail, robotics, transportation and more.
- ◆ **Alkon fittings** – Our line of fittings is one of the most extensive available on the market today. 100% performance tested. Global leader in push-to-connect fittings for easy assembly. Brass, composite and nickel plating for lasting durability in harsh operating conditions.
- ◆ **Alkon valves/flow controls** – Some of the fastest cycling and most reliable valves in the industry.
- ◆ **Trans-DOT products** – Specifically for the transportation industry; DOT-approved for use in air brake systems, air suspension systems and cabin controls for trucks, trailers, RVs, buses, transit and rail.

Keeping the world moving and working.

# Performance-proven Hydraulic Solutions

Hydraulic Pumps | Cylinders | Jacks | Swivels | Related Products

Robust engineering and skilled machinists make all Star products durable, efficient and very cost-effective. Featured on **Fox Business News' Manufacturing Marvels**.

**APPLICATIONS** – Oil and gas drilling, mining and construction, military, medical technology, nuclear energy and transportation – aviation, automotive, trucking, marine/submarine, rail.

**ANY DESIGN YOU NEED** – Small and simple designs to large and complex.

**FLEXIBLE ENGINEERING AND MACHINING** – Completely custom or modified standard designs for specific applications. Short or extended production runs, fast turnaround.

**AND MORE** – Cylinders, hydraulic jacks, post straighteners, swivels, oil reservoirs, replacement seals.
